

# GUIDELINES FOR FEEDING GOATS

## LINDNER 202 KIDS SALE PREP (PELLET):

**Protein 16.2%   Fat 3.1%   Fiber 13.7%**

The Kid Sale Prep takes a growing goat ration to a completely different level. It's designed to get young goats on feed quickly, and keep them eating, while maintaining that sale bloom all the way through the show season. A complete start to finish feed that you can use on a different variety of goats.

## LINDNER 203 PELLET:

**Protein 14%   Fat 6%   Fiber 14%**

An absolute game changer in terms of a pelleted sheep and goat feeds. It is unique in terms of protein blend, increased fiber, and high concentration of fat in the diet that can actually be utilized. This feed comes standard in 1/8 inch pellet, and was designed as a starter feed and to weather the long hot summer months when some animals become finicky eaters. However, many customers choose to stay on it through the entire show season, and have outstanding results.

## LINDNER 205 MILK PELLET:

**Protein 16%   Fat 3.5%   Fiber 12.5%**

In today's competitive livestock show market the quicker you can get them on feed and ready for customers the better. The milk pellet was designed with bloom for sale in mind. With its blend of proteins and whey, it gets nursing lambs and kids on feed quicker, while maintaining muscle tone, shape, and bloom through weaning.

## LINDNER 219 GOAT PELLET:

**Protein 17%   Fat 4.5%   Fiber 12%**

This next generation show wether feed is designed to build your projects from the inside out. Animals respond to it extremely fast throughout many different stages of the growth period. It's formulated with the idea of maintaining gut health and allowing for excellent nutrient absorption. It has been used with much success to bloom younger animals for sales. It is a complete feed that can be fed by itself, or once the desired bloom is achieved, it can be used as a top dress to maintain that shape and volume of muscle during the jackpot season. It is a perfect blend of fats and proteins to finish your projects and give them the desired athletic look while still maintaining all the muscle volume and shape that our judges desire.

## LINDNER 211 SHOW-RITE ADVANCER PLUS R20 (PELLET):

**Protein 15%   Fat 3.5%   Fiber 12%**

Advancer PLUS has Rite-Factor Technology in the bag, and added barley for a smoother look and fresher handle desired in today's competitive show arena. Utilizing specific levels of protein and energy sources, this feed has a unique ability to "Advance" maturity, muscle development, and maximize genetic potential in show goats.
